VERTICAL ELEVATOR

The Vertical Elevator provides a very space-efficient solution for elevating products. The products are collected in a buffer hopper and the specially designed plastic belts with integrated lifters elevate the products to the desired height. A chute arrangement designed for the next machine will ensure that products are evenly fed forward. The Vertical Elevator belt speed can be adjusted to control the feeding rate to the next processing stage. Larger buffer hoppers can be supplied (optional).

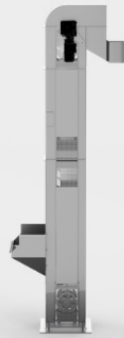

VERTICAL ELEVATOR ADVANTAGES

Adjustable belt speed

Potato buffer to create an even feeding

SIDE

FRONT

VERTICAL ELEVATOR	L (mm)	W INFEED	H OUTFEED
VE04	2550	As Desired	As Desired
